

SUMMARY

Product Designer specializing in Agentic AI, Human-AI Interaction, and Enterprise SaaS with 3+ years of experience designing intelligent systems that simplify complex workflows. I design AI-native products spanning knowledge graphs, lean back smart applications, conversational experiences, and multi-agent systems from discovery to launch. Combining architectural systems thinking with strong product intuition, I build scalable experiences that help people collaborate effectively with AI.

EXPERIENCE

Mobius by Gaian, Product Designer

Aug 2025 - Present | Hyderabad

- Led end-to-end design & strategy for SnapLogic's documentation platform as a sole designer, redesigning information architecture to reduce clicks-to-target by 40% and improve enterprise content discovery.
- Owned the design of Ved, an AI-native CMS and DITA Builder, introducing Prompt-as-a-Service workflows, AI-assisted authoring, governance, versioning, and enterprise publishing experiences.
- Designed micro-frontends across KYA Knowledge Graph, Meta Dashboard, and enterprise workflow platforms, simplifying complex AI operations into intuitive user interactions using Claude, GPT-4o, and Figma Make to accelerate mockup explorations and secure CEO-level approvals.
- Partnered with AI researchers, engineers, product managers, and enterprise stakeholders to define product direction, validate concepts, and deliver production-ready SaaS experiences.
- Built reusable AI design patterns and contributed to Component Library 2.0, enabling consistency across multiple enterprise AI products.

Mobius by Gaian, Associate UX Designer

Nov 2023 - Jul 2025 | Hyderabad

- Built scalable design systems using Atomic Design, Ant Design, and Flowbite while mentoring 5+ designers and interns and supporting design quality across agile product teams.
- Designed Reveen and Mo end-to-end as part of Mobius 12 MIAs ecosystem, showcased at CES 2024, delivering seamless cross-app experiences and personalized programmatic ads driving community engagement for Smart TV users.
- Designed core RBAC, profile & gamification experiences across Clink, Amplyfund, VotelQ, Impressio, and iZak, improving usability across consumer centric platforms by 25%.
- Helped establish and expand the SnapLogic partnership by redesigning Academy LMS experiences, building documentation brand guidelines, PRDs and responsive components.

Circle Health, Product Design Intern

Jan 2023 - Jun 2023 | Bengaluru

- Led the design of three key healthcare features, contributing to a 20% increase in user engagement.
- Designed an HR Dashboard from research through Play Store release, owning discovery, information architecture, interaction design, prototyping, and developer handoff.
- Redesigned the B2B2C healthcare platform to improve task discoverability, information density, and user satisfaction across health-tracking workflows.

Samsung, UX Researcher - MITID Live Project

Aug 2022 - Dec 2022 | Pune

- Collaborated with Samsung R&D to develop emotional design frameworks, translating behavioural insights and usability research into product experience recommendations.

Lumiere Business Solutions, Design Intern x MITID Consultant

June 2022- Dec 2022 | Mumbai

- Conducted user research, usability testing, competitive analysis, and strategic design research across lifestyle, confectionery, and EdTech client engagements. Recruited Interns for Consultation desk.

EDUCATION

Masters in Design Management

MIT Institute of Design, Pune • Third Rank
2021-2023

B.Arch (Bachelor of Architecture)

SOA IPSA, Indore • Top 10 Thesis
2015-2020

SKILLS

Design

AI Product Design • Agentic AI • Human-AI Interaction • Enterprise SaaS • Information Architecture • Design Systems • Product Discovery • User Research • Product Strategy & Analysis,Usability Testing, Cross-functional Collaboration, Wireframing & Prototyping

Tools

Figma • Bolt • Framer • Cursor • Claude • ChatGPT • Figma Make • Adobe Photoshop • Illustrator • After Effects • Miro • Jira • Confluence • Microsoft Suite

CERTIFICATIONS

Google UX Design (Google) • Generative AI for UI/UX Design (IBM) • Prompt Engineering for AI (Udemy)
